

3 Solutions for Safety & Independence

A Breakthrough Hands-Free Phone & Video Calling System

- Simply say, "Alexa, call my son" and instantly be connected on a video or audio call.
- Family members can use any modern smart phone to connect to video calls (no additional equipment needed).
- It is almost **like being there!**
- With this system, no more annoying robo or telemarketing calls.

A Voice-Activated Medical Alert Device

- Connect to our **urgent response** center 24/7.
- No wearables required. All you have to say is "Alexa, call for help".
- Emergency calls are answered within an average of 8 seconds by a trained urgent response operator.

A Virtual SmartCompanion!

- Alexa is always ready with fun and useful skills.
- She can remind you to take medications, tell you the time and the weather and so much more.
